SUPPORT THE CHARLES DARWIN FOUNDATION

The Charles Darwin Foundation (CDF) has established a new Department of Institutional Development that is charged with leadership and other support tasks in developing the resources essential for the numerous projects focused on science and conservation in Galápagos, and its staff will work with the Friends of Galapagos Organization in securing worldwide support in this important effort. The program seeks to enhance communications about our programs, improve the visitor information provided to people visiting the Darwin Research Station on Santa Cruz Island, facilitate the development of technical proposals and gift documents for foundations of all sizes and major donors, and to provide information to our cooperating Friends of Galapagos Organizations to facilitate their contacts with past, present and future supporters.

Support can come in all shapes and sizes. The Charles Darwin Foundation and its cooperating Friends of Galapagos Organizations would be happy to discuss gifts and (taking the appropriate tax laws into consideration) trusts, bequests, life insurance assignments, and pooled income funds—all instruments of deferred giving plans.

There are many opportunities and options for giving to the CDF: naming a Research Chair, creating a scholarship fund, or funding a specific scientific research program for several years, to mention but a few.

Contact the Institutional Development Representative directly (pdiaz@fcdarwin.org.ec) or any Friends of Galapagos Organization for any additional information on opportunities for giving.

Join CDF's Involved Family of Supporters.—If you have visited these unique islands on a tour, were or still are a CDF visiting scientist, staff member, volunteer, or Foundation member, you know the value and wonder of the islands and the value of the scientific and conservation programs underway in Galapagos. We invite you to get involved; let us hear from you and join us by helping secure the financial resources essential to CDF and Galápagos National Park Service programs.

This is your opportunity to continue your Galápagos involvement by supporting the unique wonders of Galápagos for today and the future. Through your financial support, you can be part of the magic...the magic of these Enchanted Islands of Ecuador. Your consideration, time and input are appreciated.
